

Required items for Homemade Trailer

3001lb. or greater GVWR

-Must meet all regulations listed in Subchapter G of vehicle code

****A link to PA code book is on enhanced inspection page*

- **Explanation Build Sheet** *(Describing how and with what it was built)*
- **Copy of receipts for all items used to fabricate**
- **Unladen weight slip** *(can use weight slip from quarry scales, scale master must sign)*
- **Axle/axles must have readable weight rating on them**
- **All wheels must have brakes on them** *(fully functioning and within specs)*
- **Commonly missed items**
 - Proper lighting/location as per chart *(***see link to lighting chart on enhanced inspection page)*
 - License plate holder *(note: must be mounted with license plate light on it)*
 - Tires must have proper load range *(tires must have equivalent load range or greater than what trailer is rated for) it is recommended that a trailer tire be used instead of a passenger or light truck tire. Trailer tires have a stiffer side wall, making them much better in a trailer application.*

Stebby's Garage Inc

Leola, PA

Required items for Kit Trailer that only has Certificate of Origin

-Must meet all regulations listed in Subchapter G of vehicle code

****A link to PA code book is on enhanced inspection page*

- **Original certificate of origin** *(not a copy)*
- **Copy of the instruction manual that came with trailer**
- **Receipt of purchase**
- **Copy of receipts for any additional items used** *(wood for deck, etc.)*
- **Unladen weight slip** *(Weight listed on papers that came with trailer is inaccurate due to added deck)
Trailer must have a deck on it except for a trailer designed to haul special cargo like a boat*
- **Commonly missed items**
 - Proper lighting/location as per chart *(***see link to lighting chart on enhanced inspection page)*
 - License plate holder *(note: must be mounted with license plate light on it)*
 - Tires must have proper load range *(tires must have equivalent load range or greater than what trailer is rated for) it is recommended that a trailer tire be used instead of a passenger or light truck tire.
Trailer tires have a stiffer side wall, making them much better in a trailer application.*
